The Building Process

Before your chosen Handmade NEMA Guitar MODEL can be constructed, the instrument must be sanded, primed, painted or wrapped, if applicable.

Painting and drying time can take up to 3 weeks.

It takes another 1-3 weeks to dry and fully cure the instrument before the components can be installed.

YOUR BUILD WILL BE DOCUMENTED

During production you will be updated as the various phases of your build progress via pictures and short video clips. From the first application of primer to your new handmade Nema Guitar to the moment when it is plugged and played for the first time there will be an audio/visual record!

Painting and curing time can take 1-3 weeks before the clear coat can be applied. It takes another 1-3 weeks to dry and cure the instrument before the components can be installed. As a result, the building process can take between 2 to 3 months to complete.
